

Apostrophe (') display issues

It appears that the character entity ' is not a valid HTML entity. It was just XML, and thus XHTML.

If you are using a browser that doesn't support XHTML then you probably shouldn't use it, as it will appear as a normal text string. I found this whilst testing something in IE 8, as that is not XHTML compliant.

So just use the ' character, or if you really feel that you have to escape it use:

'

Just be careful with that one, as it will cause coldFusion to flip out. Then you may need to escape your escape characters, and then where will you be?
